University of Virginia's School of Data
Science
Mar 2024
For [Julia Daser's](#) and I's project, [Stained Underwear](#)

PROFILE

I am a NYC-based multimedia creative technologist, community organizer and filmmaker. I create conceptual physical installations that explore gender, global politics, technology and culture. Born and raised in Singapore, I am excited about sharing South-East Asian and global narratives that subvert the western perspective through my work- I am constantly exploring ways to collaborate and build communities to create a more empathetic future together. Together with my friend [Angie](#), I co-founded a community-driven, mutual-aid student organization called [Frugalicious Mamas](#). Our goal is to make sustainability and food accessible for our school and the broader NYC. My friend [Julia Daser](#) and I also run a [YouTube channel](#), where we post open-sourced hardware tutorials. We hope to increase female representation in this industry, and make hardware accessible. I am currently organizing with United Auto Workers (UAW) at my school.

WORK EXPERIENCE

Student Employees at The New School-

United Auto Workers Union Representative

May 2024 - Present
